-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Embodiment 1: pages 39-69, drawn to the data structure that is possible to pseudo overwrite the information in a pre-determined area using a replacement mechanism including a replacement information and a replacement area. As a result, on the logical space, the file structure for pseudo overwrite is the same as the file structure for reproduction only. Thus, it is possible to reproduce data recorded in a write-once recording medium.

Embodiment 2: pages 70-75, drawn to the metadata file that is updated by the pseudo-overwrite recording when recording the image data, and the logical volume structure including a partition map is updated by pseudo-overwrite recording.

Embodiment 3: pages 76-77, drawn to the mapping of the image data in the volume structure area in the reproduction process.

Embodiment 4: pages 78-79, drawn to a file and directory tree structure is being recorded in the information recording medium.

Embodiment 5: pages 79-82, drawn to a procedure for incrementally recording new image data, and a track management information for managing last recorded address information and unrecorded areas.

Art Unit: 2627

Embodiment 6: pages 83-84, drawn to a plurality of tracks are allocated in the volume space. A track is allocated as a track for recording image data which is a portion of an image data from the metadata file to a data file.

Embodiment 7, pages 85-98, drawn to a method for repairing an error in recording using pseudo overwrite recording.

Embodiment 8, pages 99-109, drawn to a method for remapping management information list by information for implementing the pseudo overwrite according to this embodiment of the invention.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
